Administrative Assistant - Mrs. J. Bouskill.

TO THE CHAIRMAN AND MEMBERS OF THE
MELTON AND BELVOIR RURAL DISTRICT COUNCIL

Mr. Chairman, Ladies and Gentlemen,

I have the honour to present the Annual Report for 1970.

The population of the district for 1970 stands at 18,920. This is an increase of 40 over last year. The actual increase is lower this year than it was last year when the figure for 1969 was 120 up on the number for 1968.

The birth rate again dropped to 15.2 live births per 1,000 population from 15.9 in 1969 and was lower than the England and Wales figure which was 16.0 live births per 1,000 population. The actual number of live births was 288 as against 300 in 1969 and 320 in 1968. This indicates a downward trend. The illegitimate birth rate that is the illegitimate live births as a percentage of all live births was 5. This was a fall of 1 per cent from last year. The figure for England and Wales was 8. The total number of illegitimate births was 13.

The death rate dropped to 8.8 deaths per 1,000 population from 10.4 in 1969 and 10.8 in 1968. The relevant figure for England and Wales in 1970 was 11.9 - this showed a definite drop in the death rate. The actual figure for number of people dying was 167 in 1970 as against 196 in 1969 and 203 in 1968.

The infant mortality rate that is number of deaths of infants under 1 year was 7 per 1,000 live births. The actual figure was 2.

The chief causes of death were, Ischaemic Heart Disease, Cerebrovascular Disease, other forms of Heart Disease, Malignant Neoplasms of Lung and Bronchus and Bronchitis and Emphysema. There is no real change from last year. It could be noticed that twice as many males died of Ischaemic Heart Disease than females. There was a marked predominance of the younger males i.e. 45 - 74 years of age, but over the age of 74 years the deaths between the sexes were equal. There were five times the number of males dying of malignant neoplasms of lung and bronchus than of females, and this proportion persisted throughout the age groups.

Notifiable Infectious Diseases fell to 78 cases from 159 last year and 179 in 1968. This fall was most marked in Measles where the notifications were 67. Measles vaccine has been in use for some years but there is still some way to go before measles would be eradicated. Infective Jaundice was notified on two occasions - this showed quite a dramatic fall from 18 cases in 1969. However, this is a disease which is quite prevalent in some parts of the country. In October 1970 the Ministry recommended the use of a vaccine against German Measles (Rubella) in girls aged from 11 to 14 years.

Although Rubella is a mild disease it was noted that a percentage of babies, born to women who themselves contracted Rubella during the early months of pregnancy, suffered from a congenital defect such as blindness or deafness. The number of babies so affected became relatively high during a time of epidemic. So far there has been no great rush to avail themselves of this preventive inoculation. Efforts by the department continue and letters have been written to mothers pointing out the benefits for their daughters.

During the early months of 1970 and December 1969 there was a sharp epidemic of influenza. This is not a notifiable disease. Records maintained by the Department of Social Security showed a steep rise in the sickness rate throughout the county during the time of the epidemic.

The section on environmental hygiene is full of interest and I am gratefully indebted to Mr. Milburn your Chief Public Health Inspector and to members of your Public Health Staff for their section and for their continued interest and enthusiasm with which they carried out their work during the year.

I am also grateful for the support and encouragement from the members of the Council given to the Public Health Department throughout the year.

I am Ladies and Gentlemen,

G. McHUGH.

District Medical Officer of Health.

GENERAL STATISTICS

PREVALENCE OF AND CONTROL OVER INFECTIOUS AND OTHER DISEASES

<u>Disease</u>	<u>Total Cases Notified</u>	<u>Cases admitted to Hospital</u>	<u>Total Deaths</u>
Measles	67	-	-
Scarlet Fever	7	-	-
Dysentery	1	1	-
Whooping Cough	1	-	-
Infective Jaundice	2	1	-
	—	—	—
	78	2	-
	=	=	=

These figures indicate a definite fall in notifiable cases of infectious diseases. This refers chiefly to measles where the fall was from 131 cases in 1969 to 67 in 1970. This fall was to be found in all age groups of children usually affected. The use of measles vaccine played some part in this fall.

VACCINATION AND IMMUNISATION PROCEDURES

The following vaccinations and immunisations were carried out by the Medical Practitioners in the area:-

Smallpox. Diphtheria. Whooping Cough. Tetanus.
 Poliomyelitis. Measles and German Measles.

These procedures were organised by the County and the Computer is used to notify parents when their children are due for a vaccination or immunisation.

Measles vaccine has been in use since 1968 and is becoming more popular, but there is still some way to go before the illness is eradicated. German Measles or Rubella as this illness is popularly known came into use in October 1970. Continual efforts are made to parents through schools to popularise this vaccination which protects girls before leaving school against becoming infected with Rubella which has been shown to be connected with various congenital defects suffered by babies whose mothers became infected with rubella in the early months of pregnancy.

B.C.G. vaccination against Tuberculosis was made available to all 12 year old pupils and this was carried out by the Medical Officer in the schools.

The relevant figures are:-

BOTTESFORD HIGH SCHOOL

<u>No. of Pupils</u> <u>Skin Tested</u>	<u>Results</u>		<u>Pupils</u> <u>Vaccinated</u>	<u>X-rayed</u>
	<u>Positive</u>	<u>Negative</u>		
129	18	111	117	4

Vaccination & Immunisation - continued.

Four pupils were found to be strongly positive and had Chest X-rays at Nottingham. These X-rays showed that the chests were clear. B.C.G. vaccination for other age groups or for contacts is available at the County Chest Clinic, at the discretion of the Consultant Chest Physician..

LABORATORY FACILITIES

The following examinations have been carried out at the Public Health Laboratory, Leicester.

Milk	39
Water	33
Ice Cream...	16

Ambulance Facilities: House Nursing Service: Home Help Service:
Maternity and Child Welfare: School Health Services: Child Life
Protection:

The Leicester County Council is the responsible authority for administration of these services.

National Assistance Act, 1948 - Section 47

No action taken during the year.

SANITARY CIRCUMSTANCES OF THE AREA

WATER

Number of samples taken for bacteriological examination:-

(a) from wells	19
(b) from piped supply... ..	14

Results of samples taken:-

From wells - Satisfactory..	6
Unsatisfactory	13
From piped supply - Satisfactory...	14
Unsatisfactory.	Nil

Number of wells:-

(a) closed..	7
(b) cleansed	Nil

Number of cases in which piped supply was substituted for well water.. 7

Number of Parishes without a piped water supply.. Nil

Number of houses now on piped supply. ... 7024

Number of Parishes and Part Parishes with piped water supply:-

- (a) from public mains - 25 Parishes
- (b) from private reservoirs - 1 Part

Existing Water Supplies

The greater part of the district is now supplied with water from the River Dove. Stand pipes are not provided, the services being laid to consumers premises.

There is no indication of any tendency to Plumbo Solvency in the piped supplies.

The fluoride content of the water supplied in any part of the district is less than 0.2 p.p.m.

During the year under review there were no shortages, and the use of hosepipes was not banned.

DRAINAGE AND SEWERAGE

Western Area. Phase II of this contract (which serves 6 villages) progressed satisfactorily during the year, and it is anticipated that all the work will be completed early next year.

Eaton and Branston. This scheme was completed during the year.

Burton Lazars. Although the scheme was not completed during the year sewage was being treated at the new works.

Twyford and Thorpe Satchville. The Council's appeal against the Trent River Authority's condition was successful, and permission was given for tenders to be invited. It is anticipated that the scheme will commence next year.

Barsby and Ashby Folville. Permission to invite tenders is awaited from the Department of the Environment.

Waltham on the Wolds Regional Scheme. A scheme to serve 8 villages was considered and approved by the Council. The necessary planning permissions have to be obtained; also the agreement of the several owners of land required for the sewage works and pumping stations. When these have been obtained the scheme will be submitted to the Department of the Environment.

Sanitary accommodation.

Total number of water closets in the area	7093
---	-----	------

Total number of pail closets is..	183
-----------------------------------	-----	-----	-----	-----

There were only 16 applications for a pail conversion grants received and approved, during the year 25 conversions were completed.

Public Cleansing

Refuse is collected from all households at intervals of six working days.

Nightsoil is collected weekly from 38 villages and 7 part villages, in the remaining 20 villages and 7 part villages no collection is made because these have a mains water supply and an efficient sewage disposal works available.

A fleet of modern vehicles is maintained comprising:-

- 2 - S.D./Bedford 35 cu.yd. Pakamatic Refuse Collecting Vehicles.
- 3 - S.D. combined nightsoil and cesspool emptiers, 800 gallon capacity.
- 1 - S.D. refuse collector as a "stand by".
- 1 - S.D. cesspool emptier as a "stand by".

Household refuse is disposed of by controlled tipping and no difficulty has been experienced. The levelling is carried out by means of a blade etc., attached to a tractor. Part-time attendants are also employed at the tips. The system has been found satisfactory.

The disposal of nightsoil is to farms where it is ploughed into the land as manure. There is at present no difficulty in disposal, and in view of the amount of ploughed land it is not anticipated that this will create a problem in the immediate future. The contents of cesspools and septic tanks are also disposed of in this manner, but since the completion of the sludge drying plant at Asfordby Sewage Works an additional means of disposal is now available.

The present system of conversion is by voluntary methods and has resulted in the conversion of 25 pail closets to water closets during the year. There remains only 183 pail closets yet to be converted to water closets.

The Council is continuing to empty house cesspools on request from the occupiers at a standard charge of 10/- per dwelling. Cesspools at trade premises are emptied at a charge of 10/- per hour.

SANITARY INSPECTION OF THE AREA

The particulars given under this heading are for all purposes including particulars given elsewhere in this report:-

Total number of complaints received	114
Total number of defects or nuisances discovered	200

	<u>Inspections</u>
Animal Keeping	11
Bakehouses	6

Offices, Shops and Railway Premises Act 1963

There were two new registrations under the Act. The total number of registered premises at the end of the year was 47.

Forty-seven inspections were carried out and advice and guidance was given as necessary. It was found that most occupiers co-operated in maintaining their premises to the required standard and no formal action was necessary.

Caravan Sites & Control of Development Act, 1960

A total of fifty-seven inspections were made of the thirty-three registered sites during the year. The number of site licences which either lapsed or from which the caravans were removed was four and at the end of the year there were forty-two caravans on the licensed sites.

Informal action was taken where necessary to deal with contraventions of the Act and in the majority of cases the regulations and conditions and the licences were complied with.

Housing Act, 1936 - Part IV Overcrowding

1.	(a)	Number of dwelling houses overcrowded at the end of the year.....	Nil
	(b)	Number of cases of overcrowding reported during the year.....	2
	(c)	Number of cases of overcrowding relieved during the year.....	2
	(d)	Number of persons concerned in such cases.	10

Other action under the Housing Acts.

Since the commencement of the Slum Clearance programme in 1955 a total of 483 houses have been dealt with by either being demolished, closed or having been brought up to a good standard of fitness; some of them with the aid of an Improvement Grant.

Improvement Grants.

Application for grant aid increased during the year the figure of 52 in 1969 to 84 in 1970.

These were:

40 Improvement Grants with a total amount of £22,666 of which only four were awarded the maximum of £1,000. 44 Standard Grants with a total amount of £9,277 were approved.

There were 29 Improvement Grant works completed. The total grant money paid on these was £13,967.

29 Standard Grants were completed and money paid on these amounted to £5,564.

Total number of Discretionary Grants approved ...	754
